PROCESS FLOW (FROM FARM TO EXPORT)

🌱 1. HARVESTING

- Selected cumin and ajwain crops are sourced from trusted Indian farmers
- Harvesting is done at optimal maturity stage to ensure maximum aroma and oil content
- Raw material is carefully collected to avoid damage and contamination

🚚 2. RAW MATERIAL RECEIVING

- Incoming material is inspected for quality, moisture, and impurity levels
- Only approved lots are accepted for processing
- Initial cleaning and grading is performed before storage

🏢 3. CLEANING & SORTING (GODOWN PROCESS)

Material is processed through sortex / machine cleaning systems

Removal of:

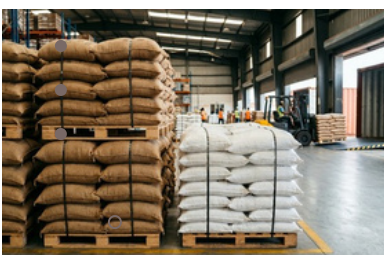

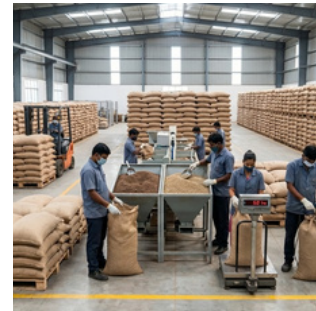

- dust
- stones
- immature seeds
- foreign particles

Multiple stages of cleaning ensure uniform quality
This stage ensures export-grade purity and consistency

📋 QUALITY ASSURANCE

At every stage, strict quality control is maintained to ensure:

- consistent aroma and purity
- low moisture content
- export compliance standards
- safe and hygienic handling

📦 5. PACKAGING

Cleaned and graded material is packed in hygienic conditions

Standard packaging:

25 kg PP bags

50 kg PP / jute bagsOptional:

Private labeling

Buyer-specific packaging requirements
